

## CIS 101 Screening Test Student Feedback

Please see the department website (<http://academic.pgcc.edu/cios>) for additional information about the following options, including information about IC3 and course descriptions.

| <b>If your score is</b> | <b>You should</b>   |
|-------------------------|---|
| 50 or above             | Think about testing out of CIS 101. Arrange to take the Internet and Computing Core Certification (IC3) exams. Achieving certification and presenting to the registrar results in getting credit for CIS 101.   |
| 40-49                   | Consider taking a rapid review followed by the IC3 (see above). The rapid review course is CIS 099, which is conducted mostly online. You will receive specific preparation for the exams. Please see the Department website for a complete description of this 1 CEU course.                                   |
| 15-39                   | Remain in CIS 101   |
| Below 15                | Enroll in CIS 100, a 1-credit course that is taught over 4 weeks. You can still complete CIS 101 during the current semester after that if you wish. See department website for complete details. The course will help you gain the familiarity you need with basic computer usage before enrolling in CIS 101. |
