

*Proposed Core Educational Outcomes*

*Departmental/Divisional Discussion Questions*

1. Has the General Education Committee left out intellectual competencies/dispositions that are essential to the college learning process? If so, which ones and how might they be integrated into the proposal?
2. Are the levels (Bloom or otherwise) of the proposed outcomes the levels that we want our students to achieve?
3. How do we incorporate these outcomes into our classes and what impact will they have on our teaching?
